Education

M.S. Candidate (Tongji University)

Shanghai, China

College of Architecture and Urban Planning.

Sep. 2024 - Mar. 2027

Key Laboratory of Ecology and Energy-saving Study of Dense Habitat, Tongji University.

Current Average score: 86.13.

Advised by *Prof. Dr. Yu Ye*.

B.Eng. (Chongqing University)

Chongqing, China

College of Architecture and Urban Planning.

Sep. 2019 - Jun. 2024

Average score: 89.32; GPA: 3.81/4.00, Rank:4 (Top1%)

Graduated with Honor: Outstanding Graduate Award; National Scholarship Award (Top 1%).

Research Interests

• Human-centred computational urban research:

Examining how built environments and urban places shape accessibility, well-being, and lived experience, particularly for children and other mobility-vulnerable groups.

• Multimodal urban analytics:

Investigating whether mobility-supportive environments, urban services, and place quality are aligned with local needs, and translating fine-grained spatial diagnosis into targeted planning and design interventions.

Methodological approach

I use multimodal urban analytics that integrate multi-source geospatial and location-based data, street-view imagery and deep learning, spatial and network analysis, LLM-assisted evidence and UGC analysis, and wearable biosensing to connect city-scale measurement with human-scale experience.

Publications

Peer-Reviewed Journal Articles

Liu X & Qu L. (2026). A multi-source data-driven paradigm for urban renewal: A case study of the Xuhui Waterfront and the Expo-Qiantan in Shanghai. *Architecture & Culture*. Forthcoming. (In Chinese, DOI: <https://doi.org/10.19875/j.cnki.jzywh.2026.09.001>)

Manuscripts in Review

Qu L, Liu X, Zhang L, Yu H, & Ye Y. (2026). Measuring active school travel friendliness via big data and wearable biosensors: An evidence-based approach for child-friendly cities. *Cities*. (Under review, third round;

decision in process since 30 June 2026).

Lei J, **Qu L**, & Ye Y. (2026). From place advantage to platform dependency: How the platform economy modulates built environment effects. *Environment and Planning B: Urban Analytics and City Science*. (Under review.)

Qu L, Lei J, & Ye Y. (2026). Station–city oriented leadership in integration and development (SOLID): A data-informed evaluation system from a human-centred perspective. *Land Use Policy*. (Under review.)

Conference Presentation

Qu L, & Liu X. (2025) Evaluating the quality of children’s active school travel spaces through multi-source big data: An approach for informing better child-friendly urban design. *The 37th Association of European Schools of Planning (AESOP) Annual Congress*. Istanbul, Türkiye.

Qu L. (2026) Assessing station–city integration from a human-centred perspective: A new Node–Place framework applied to Chinese high-speed rail station areas. *The 66th Association of Collegiate Schools of Planning (ACSP) Annual Conference*. Pittsburgh, United States. (Accepted for oral presentation)

Research and Professional Experience

Tongji University / Computational Urban Design Lab	Shanghai, China
Research Assistant	Sep. 2024--Present
<i>PI: Yu Ye, Tenured Professor of Urban Design, Tongji University</i>	
Research focuses on quantitative urban morphology, urban equity, and computational urban design.	
Skilled in ArcGISPro, Python, Rhino, Figma, etc.	

Key Laboratory of Ecology and Energy-saving Study of Dense Habitat	Shanghai, China
Research Student	Sep. 2024--Present

Shanghai Tongji Urban Planning and Design Institute Co., Ltd.	Shanghai, China
Urban Design Intern	Sep. 2024--Present
Participated in urban design projects in Shanghai, Chengdu, Zhejiang, and Hubei. Responsibilities included data analysis, design, report writing, and compiling urban design guidelines.	

Institute of High-Speed Rail and Station–City Integration, Tongji University	Shanghai, China
Research Assistant	Jan. 2025--Jul. 2026
Contributed as a core researcher to a collaborative project between China Railway Siyuan Survey and Design Group Co., Ltd. and the Institute of High-Speed Rail and Station – City Integration, Tongji University, titled Value Creation and Benefit Sharing in Station – City Integration Development in China. Contributed substantially to the first sub-project, Developing a Value System and Evaluation Methodology for Station – City Integration.	

Major Awards

Scholarships

2024–2025	Merit Master's Student Scholarship, Tongji University
2024	Outstanding Graduate Award, Chongqing University
2020	National Scholarship: Highest honour awarded by the Ministry of Education. (Top 1%)
2020–2022	Outstanding Student Award and Scholarship, Chongqing University

Competitions and Practices

2022	China Architecture Newcomers Competition, Top 100
2022	Delta Cup International Solar Building Design Competition, Excellence Award
2022	The 8th China Human Settlements Design Annual Award, Architectural Design Category, Bronze Award
2022	National College Student Rural Planning Competition, Rural Design Scheme Category, Third Prize
